

Hardware Trade-In

The Visix Trade-In program allows Software Maintenance and Support Agreement (SMA) customers with legacy hardware to upgrade their components at a greatly reduced cost. SMA customers who take advantage of this program will receive new hardware with the latest version of Visix software pre-installed.

Requirements

- Customer must be a current SMA subscriber with all Content Managers and Channel Players covered. If not, purchase of the SMA is required for a minimum of one year
- Customer must supply the serial numbers of the products to be upgraded to Visix for verification
- Customer must return original hardware to Visix in working order with all required accessories. A fee of \$400 will apply for each Content Manager or Channel Player not returned.
- Hardware Options (Video Window, Scan Converter, Extended Widescreen Support, Wireless) from legacy systems are not compatible with the hardware detailed below

Configuration Transfer Services

Visix can transfer the content and configuration from your system with minimal user intervention. Depending upon the version, Visix may be able to retrieve all needed information with a simple Web session. Items that can be transferred include:

- **Content** - All of your content can be transferred from your existing Content Manager to the upgraded Content Manager
- **IP Address** - IP Address information assigned to your Content Manager or Channel Player can be transferred to the upgraded unit in order to facilitate an easy transition
- **Computer Name** – Whether the default name is in place or the customer has renamed it, this can be transferred to the new Content Manager or Channel Player

Visix is not able to transfer all information, for example:

- **Domain Membership** – The end user must complete this step because a domain administrator must input a password to join a domain
- **Group Policies** – Group policies will not be transferred; however, the end user may reapply them
- **User Installed Software** – Third party software that is installed on the Content Manager or Channel Player cannot be transferred and must be re-installed by the end user

Per Content Manager	AXIS-TV-IMW	\$300.00
Per Channel Player	AXIS-TV-IMW	\$100.00

Content Manager with Scalable Applications

Size: 17"w x 22.5"d x 3.5"h
